    - Sentence segmentation
    - Tokenization (word segmentation)
    - Morphology (lemmas, POS tags, features)
    - Syntax (relations between words)
- Evaluation: How good is it?
  - Align system-produced and gold-standard words
  - For the aligned pairs:
    - Percentage of correctly assigned lemmas, POS tags, feature values
    - Tree structure: correctly assigned parent node + relation type
    - Combined score (morpho+syntax): MLAS
