System of layers in FGD

meaning

deep / underlying syntax
tectogrammar

surface syntax

morphematics

morphonology

expression

phonology/phonetics

System of layers in FGD (cont.)

sentence ... full representation on each layer of description

each layer ~ set of descriptions for all possible sentences

- finite set of elementary units
- finite set of operations and relations → set of complex units
- finite set of relations between sentence representations on a particular layer and its representations on adjacent layers

System of layers in FGD (cont.)

sentence ... full representation on each layer of description

each layer ~ set of descriptions for all possible sentences

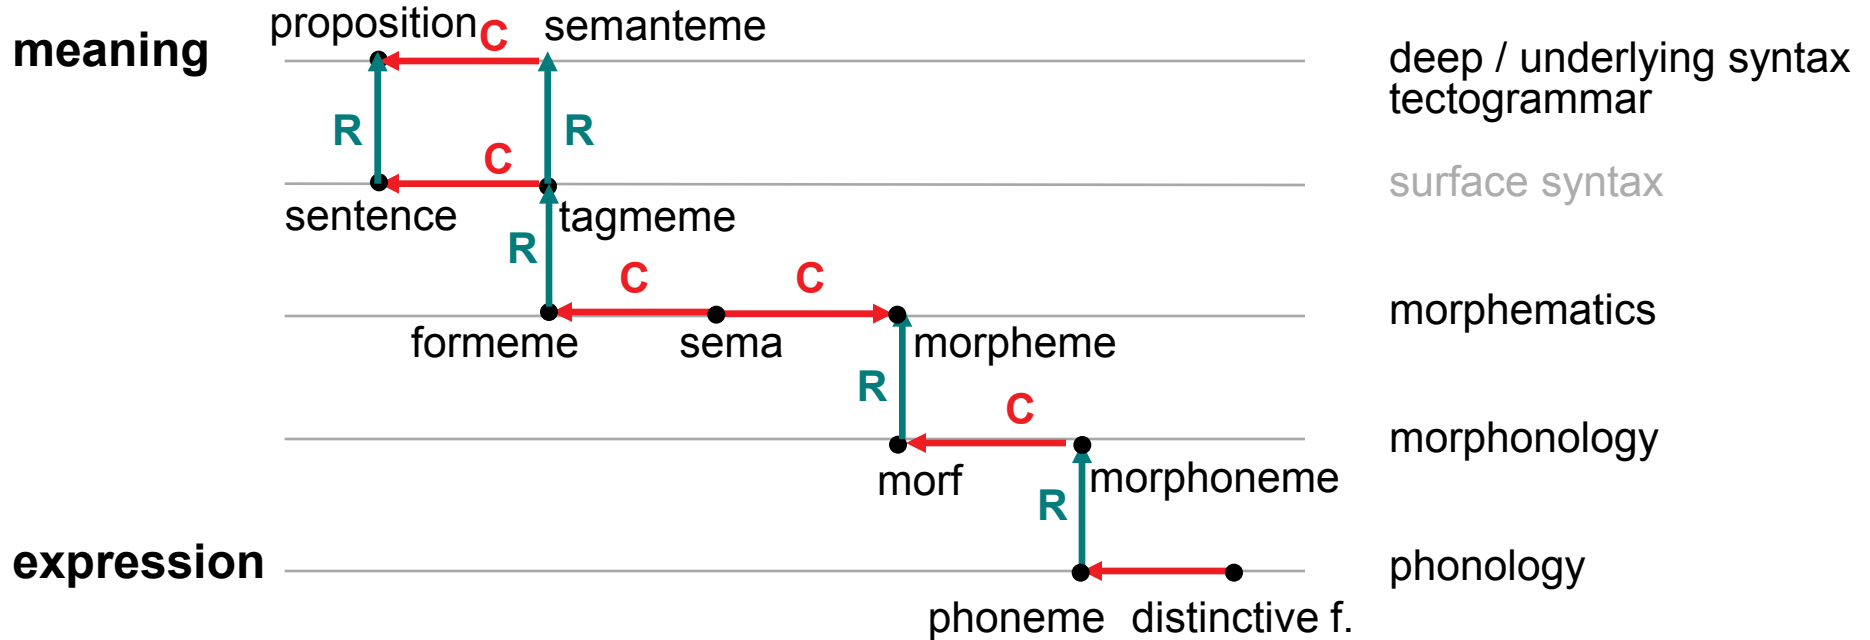

- finite set of elementary units
- finite set of operations and relations → set of complex units
- finite set of relations between sentence representations on a particular layer and its representations on adjacent layers

type C relations (composition): elementary units constitute complex units
i.e., relations between units of the same layer

type R relations (representation): form-function relation
i.e., relation between adjacent layers

System of layers in FGD

Two layers of syntax in FGD

tree-based dependency structure

- nodes for tagmemes / sememes (complex symbols)
- edges labeled with a type of a respective syntactic relation

The layer of **surface syntax**

My brother often sleeps in his study.

Po babiččině příjezdu půjdou rodiče do divadla.

[After grandma's arrival the parents will go to the theatre.]

The layer of **surface syntax**

surface syntactic tree

- ~ nodes for formemes → *tagmemes* / sentence members
(cz school syntax: větné členy)
- ~ edges for syntactic relations

+

surface word order ... linear ordering of tree nodes

The layer of **surface syntax**

surface syntactic tree

- ~ nodes for formemes → **tagmemes** / sentence members
(cz school syntax: větné členy)
- ~ edges for syntactic relations

+

surface word order ... linear ordering of tree nodes

3 types of elementary units:

- lexical: units from a dictionary
- morphological: set of morphological features ~ **tags**
(a pair of) trousers ... sema - plural
- syntactic: subject, object, attribute, adverbial, complement,...

The layer of **deep syntax**

~ meaning of a sentence:

semantemes: lexical (autosemantic) words, their lexical and morphological features and mutual relations

terminology: deep / underlying / tectogrammatical representation (TR)

The layer of **deep syntax**

~ meaning of a sentence:

semantemes: lexical (autosemantic) words, their lexical and morphological features and mutual relations

terminology: deep / underlying / tectogrammatical representation (TR)

3 basic types of elementary units:

- lexical: units from a (tectogrammatical) dictionary
- morphological: ***grammatemes***

meaning of individual morphological categories

(a pair of) trousers ... singular
denominating (*pojmenovávací*)

vs. *correlating* (*usouvztažňující*) categories

- syntactic: types of relation, ***functors*** and ***subfunctors***
Actor, Patient, Addressee, ... local, temporal modifications ...

The layer of **deep syntax**

~ meaning of a sentence:

semantemes: lexical (autosemantic) words, their lexical and morphological features and mutual relations

terminology: deep / underlying / tectogrammatical representation (TR)

3 basic types of elementary units:

- lexical, grammatemes, functors

deep word order

- increasing communicative dynamism:
word order reflects "relative degree of importance in comparison with other expressions in the sentence [...]"
- topic focus articulation

condition of ***projectivity*** !!!

The layer of deep syntax

Po babiččině příjezdu půjdou rodiče do divadla.

[After grandma's arrival the parents will go to the theatre.]

The layers of **deep** vs. **surface syntax**

- different sets of elementary units
 - 'morphological' lemma vs. tectogrammatical lemma
 - morphological categories vs. grammemes
 - surface sentence members vs. functors
- ⇒ different sets of complex units
 - **tagmeme** vs. **semanteme**

The layers of **deep** vs. **surface syntax**

- different sets of elementary units
 - 'morphological' lemma vs. tectogrammatical lemma
 - morphological categories vs. grammemes
 - surface sentence members vs. functors
- ⇒ different sets of complex units
 - **tagmeme** vs. **semanteme**

tagmemes: only *autosemantic / lexical words* at TR

– **modal verbs**

Peter wants to attend the concert. [to attend + volitive]

Charles has to pass the exam. [to pass + debitive]

– **nominalization**

After grandma's arrival ... → [to arrive]

– **active / passive verbs** → [active form]

Tato krásná kniha byla vydána nakladatelstvím Albatros.

[This beautiful book was published by the Albatros publishing house.]

The layers of **deep** vs. **surface syntax**

- different sets of elementary units
 - 'morphological' lemma vs. tectogrammatical lemma
 - morphological categories vs. grammemes
 - surface sentence members vs. functors
- ⇒ different sets of complex units
 - **tagmeme** vs. **semanteme**

tagmemes: only *autosemantic / lexical words* at TR
completeness of the representation

- (surface) ellipses are restored
- omitted surface subject, object, comparison ...

Czech: *Vidíš bratra? Vidím. Přichází.*

→ [Ty] vidíš bratra? [Já] vidím [ho]. [On] přichází [sem].

Russian: *Ты видел брата? Вижу [его]. Идём.*

Spanish: *¿Ves este tronco? [(Do) you see this log?]*

The layers of **deep** vs. **surface syntax**

- different sets of elementary units
 - 'morphological' lemma vs. tectogrammatical lemma
 - morphological categories vs. grammemes
 - surface sentence members vs. functors
- ⇒ different sets of complex units
 - **tagmeme** vs. **semanteme**

tagmemes: only *autosemantic / lexical words* at TR
completeness of the representation

deep word order

- **projective** trees
- increasing **communicative dynamism**
