

Valency in the Prague Dependency Treebank

Markéta Lopatková

Institute of Formal and Applied Linguistics, MFF UK

lopatkova@ufal.mff.cuni.cz

Valency in PDT / PCEDT: Outline

- concept of valency
as the keystone for syntactic structure
- valency in PDT and PDT-Vallex
valency in PCEDT and EngVallex, CzEngVallex

documentation:

PDT: <http://ufal.mff.cuni.cz/pdt2.0/doc/manuals/en/t-layer/html/index.html>

PCEDT: <https://ufal.mff.cuni.cz/pcedt2.0/en/documentation.html>

Concept of Valency

- valency ... Tesnière (1959)
 - syntactic structure
 - semantic structure

➡ dependency syntax \approx valency syntax

Concept of Valency

- valency ... Tesnière (1959)
 - syntactic structure
 - semantic structure

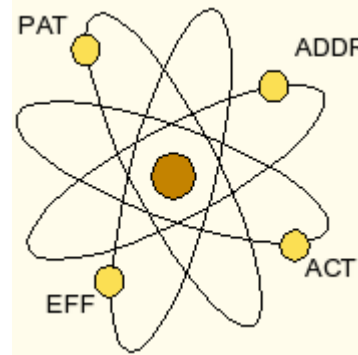

➡ dependency syntax ≈ valency syntax

- binary division

- verb centrality

stemmas

= diagrammatic representations

Alfred parle lentement
'Alfred speaks slowly'

Filius amat patrem
'(The) son loves (the) father'

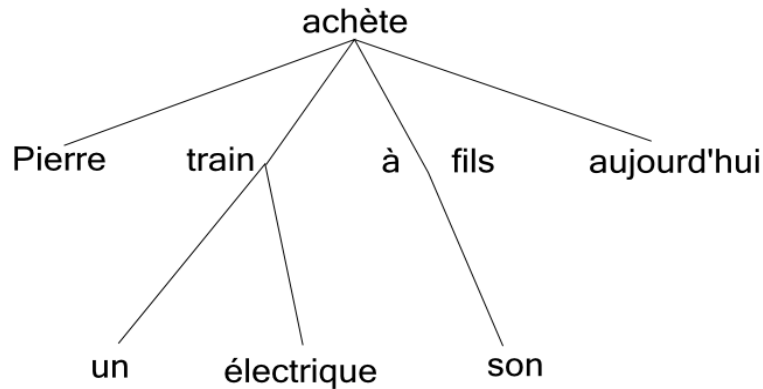

Concept of Valency

- valency ... Tesnière (1959)
 - syntactic structure
 - semantic structure

➡ dependency syntax ≈ valency syntax

stemma

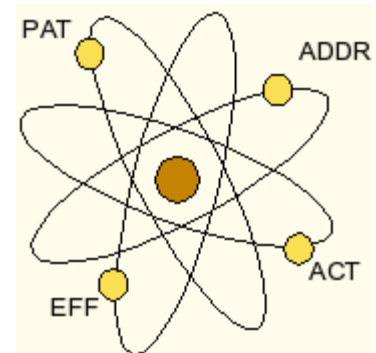

*Aujourd'hui Pierre achète à son fils un train électrique.
Today Pierre is buying his son an electric train.*

Concept of Valency

- Concise Oxford Dictionary of Linguistics (Matthews, 1997):
valency – *the range of syntactic elements either required or specifically permitted by a verb or other lexical unit ...*
- Svozilová et al. (1997):
„Valencí rozumíme v lingvistice schopnost lexikální jednotky, především slovesa, vázat na sebe jiné výrazy a mj. tak zakládat větné struktury.”

Concept of Valency

- Concise Oxford Dictionary of Linguistics (Matthews, 1997):
valency – *the range of syntactic elements either required or specifically permitted by a verb or other lexical unit ...*
- Svozilová et al. (1997):
„Valencí rozumíme v lingvistice schopnost lexikální jednotky, především slovesa, vázat na sebe jiné výrazy a mj. tak zakládat větné struktury.”

*Stát vyplatil restituentům miliony za zabavený majetek /
The state paid the restituent millions for condemned property*

*Státem byly vyplaceny restituentům miliony /
Restituentům se vyplatily miliony /
Millions were paid to the restituent for condemned property*

*Stát nechal vyplatit restituentům miliony /
The state had the millions paid to the restituent*

*Restituenti dostali vyplaceny miliony /
The restituent got millions paid out*

vyplatit / pay (out)

Actor Addressee Patient Effect
state restituent millions property

Valency Stored in Valency Dictionaries

- valency structure of lexical units

vyplatit / to pay ... Actor Addressee Patient (Effect)
spát / to sleep Actor
sídlit / to reside Actor Location
pršet / to rain – ('dummy subject')

⇒ valency dictionaries:
number and type of valency dependents

Valency Stored in Valency Dictionaries

- valency structure of lexical units

⇒ valency dictionaries:
number and type of valency dependents

- prototypically: a single valency structure \approx a single word sense

*odpovídat*₁ ... Actor Addressee (Patient) Effect
 \approx dávat odpověď [to answer]

*odpovídat*₂ ... Actor Patient Effect
 \approx reagovat [to react, to respond]

*odpovídat*₃ ... Actor (Addressee) Patient
 \approx mít odpovědnost [to be responsible]

*odpovídat*₄ ... Actor Patient
 \approx být ve shodě [to correspond, to meet]

Valency Stored in Valency Dictionaries

- valency structure of lexical units

⇒ valency dictionaries:
number and type of valency dependents

- prototypically: a single valency structure \approx a single word sense

*admit*₁ ... Actor Patient

This admits of two possibilities.

\approx to concede (připustit/připouštět, dovolit/dovolovat)

*admit*₂ ... Actor Patient Location

She was admitted to the hospital.

\approx to take (přijmout/přijímat, umístit/umísťovat)

⇒ valency lexicon as an *inventory of word senses*

Prominent Examples of Valency Theories

- syntactically based:
 - Lucien Tesnière (1959) ... actants (first / non-first) and circumstants
 - PropBank ... arguments (Arg0, Arg1, ...) and modifiers (ArgM)

Prominent Examples of Valency Theories

- syntactically based:

- Lucien Tesnière (1959) ... actants (first / non-first) and circumstants
- PropBank ... arguments (Arg0, Arg1, ...) and modifiers (ArgM)

- semantically based:

- Charles J. Fillmore (1968)

deep cases: Agentive, Objective, Locative, Instrument, Dative, ... (the list differs)

case frame ... each verb selects a certain number of deep cases

The door (O) opened.

The janitor (A) opened the door (O).

This key (I) opened the door (O).

The janitor (A) opened the door (O) with this key (I).

} *to open ... +[__O (I) (A)]*

grammatical functions are determined by the deep valence of the verb

HOWEVER: FrameNet <http://framenet.icsi.berkeley.edu>

- verbs (and other units) evoke a semantic frame (SF)

buy ... SF Commerce_buy Buyer, Goods (core semantic elements)
Seller, Money, ...

Prominent Examples of Valency Theories

- Czech linguistics:
- František Daneš (1981, 1987) ... intention vs. valency
 - complex sentence patterns (KVV, komplexní větný vzorec):
 - **grammatical sentence pattern** (GVV, gramatický větný vzorec)
 - Karel rozbil okno. / Karel broke the window. S_{nom} – VF – S_{ak}
 - Otec mi řekl, že nic neví. / My father told me that he knows nothing.
S_{nom} – VF – S_{dat} – S_{ak} / že SENT
 - obligatory / potential / facultative positions
 - **semantic sentence pattern** (SVV, sémantický větný vzorec) ... *microsituation*
 - Karel rozbil okno. AGENS – PRED – PATIENS
 - Jan dal Petře knihu. / Jan gave Petra a book ~ Jane gave a book to Petra.
AGENS – PRED – RECIPIENT – PATIENS
 - two basic types of semantic roles:
 - substantive (cz substanční) ... physical objects, location, temporal m.
 - situational (propositional) ... e.g., information
- Jarmila Panevová (1974, 1980, 1994)

Valency in FGD

- mostly syntactic criteria (coarse-grained deep roles)
 - Panevová (1974-5; 1980; 1994; ...)
 - lexical words: *verbs*, nouns, adjectives, adverbs
frame evoking words / frame bearing words
- layers of language descriptions:
 - primarily tectogrammatical layer
 - ... number, type of dependents
 - reflected also at the surface and morphemic layers
 - ... morphological form

Valency in FGD

- mostly syntactic criteria (coarse-grained deep roles)
 - Panevová (1974-5; 1980; 1994; ...)
 - lexical words: **verbs**, nouns, adjectives, adverbs
frame evoking words / frame bearing words
- layers of language descriptions:
 - primarily tectogrammatical layer
... number, type of dependents
 - reflected also at the surface and morphemic layers
... morphological form

	actants (inner participants) (~ arguments)	free modifications (~ adjuncts)
obligatory		
optional (cz fakultativní)		

valency frame
stored in a valency lexicon

Actants vs. Free Modifications

- stress on functional tests:
 - can be the given type of dependent repeated?
 - can the given dependent modify any verb?

NO ⇒ *actants*

Matka.ACT předělala dětem.ADDR loutku.PAT z Kašpárka.ORIG na čerta.EFF.

Mother.ACT remodeled the puppet.PAT for children.ADDR from Kasper.ORIG to a devil.EFF.

→ they correspond to objects (direct or indirect)

Actants vs. Free Modifications

- stress on functional tests:
 - can be the given type of dependent repeated?
 - can the given dependent modify any verb?

NO ⇒ *actants*

Matka.ACT předělala dětem.ADDR loutku.PAT z Kašpárka.ORIG na čerta.EFF.

Mother.ACT remodeled the puppet.PAT for children.ADDR from Kasper.ORIG to a devil.EFF.

→ they correspond to objects (direct or indirect)

- additional characteristics of actants:
 - the verb prescribes the form of its actant(s) (cz rekce)
potkat někoho, informovat někoho, myslet na něco/na někoho, soustředit se na něco, učit někoho něco/něčemu, odpovídat něčemu; bát se něčeho, docílit něčeho
 - semantically more or less indistinct
- empirically: 5 actants for verbs
Actor (ACT), Patient (PAT), Addressee (ADDR), Origin (ORIG), Effect (EFF)

Actants vs. Free Modifications

- stress on functional tests:
 - can be the given type of dependent repeated?
 - can the given dependent modify any verb?

YES ⇒ *free modifications*

V Praze.LOC se sejdeme na Hlavním nádraží.LOC u pokladen.LOC.

In Prague.LOC we will meet at the Main Station.LOC. near the booking office.LOC.

→ they correspond to adverbials (Time, Location, Manner, Cause)

Actants vs. Free Modifications

- stress on functional tests:
 - can be the given type of dependent repeated?
 - can the given dependent modify any verb?

YES ⇒ *free modifications*

V Praze.LOC se sejdeme na Hlavním nádraží.LOC u pokladen.LOC.

In Prague.LOC we will meet at the Main Station.LOC. near the booking office.LOC.

→ they correspond to adverbials (Time, Location, Manner, Cause)

- additional characteristics of free modifications

– semantically more or less homogenous

Time: he came in time.TWHEN; how long.THL have you been living there?

Location or Direction: he came home.DIR3; he lives in Prague.LOC

Manner: how.MANN do you do? he appeared with his girlfriend.ACMP

Cause: He died of tuberculosis.CAUS; I will not tell you (because ...).CAUS

- empirically: over 35 types for verbs

Actants vs. Free Modifications

- actants
 - ~ more or less theta roles / θ -roles
(Chomsky, Standard Theory; Theory of Government and binding)
 - ~ deep cases (Fillmore, 1968)
 - ~ arguments
 - ~ ~~core dependents in UDs (= subj, obj, iobj)~~
 - ~ Tesnière: actants
- free modifications
 - ~ adjuncts
 - ~ ~~non-core dependents in UDs (= obl, adv)~~
 - ~ Tesnière: circumstants

Obligatory vs. Optional Dependents

- obligatory vs. optional (cz: fakultativní)
- **dialogue test** (Panevová, 1974):
criterion of obligatoriness for free modification

A: *Přátelé už přišli.* A: *Our friends have already come.*

B: *Kam?* B: *Where (do they come)?*

A: **Nevím.* A: **I don't know.*

applicable also for actants

Obligatory vs. Optional Dependents

- obligatory vs. optional (cz: fakultativní)
- **dialogue test** (Panevová, 1974):
criterion of obligatoriness for free modification

A: *Přátelé už přišli.* A: *Our friends have already come.*
B: *Kam?* B: *Where (do they come)?*
A: **Nevím.* A: **I don't know.*

applicable also for actants

- BUT: possibility not to express a dependent in a surface
(cz 'vypustitelnost')
- general actant vs. unspecified vs. surface ellipsis

Byl pochválen {#PersPron.PAT}
Jana prodává u Baťa {#Gen.PAT}
Vedoucí podniku odcestoval {#Oblfm.DIR1}
Petr a Marie se potkali v Praze {#Rcp.PAT}
Psali to v novinách {#Unsp.ACT}

lit. *(He) was praised {#PersPron.PAT}*
lit: *Jana sells at Baťa {#Gen.PAT}*
lit: *The boss of the company left {#Oblfm}*
Petr and Marie have met in Prague {#Rcp.PAT}
lit: *(They) wrote it in the _newspapers {#Unsp}*

Concept of *Shifting* for Actants

Petr.ACT přišel.

Kniha.ACT již vyšla.

Jan.ACT spadl se skály.

Petr.ACT krájí cibuli.PAT.

Jan.ACT oslovil Marii.PAT.

Petr.ACT vykopal jámu.PAT.

*Z banálního nachlazení.PAT se vyvinulo
závažné onemocnění.ACT.*

*Strana.ACT jej.PAT nominovala
na prezidenta.EFF.*

Jan.ACT vyrostl z jinocha.ORIG v muže.PAT.

Petr.ACT has already come.

The book.ACT has already appeared.

Jan.ACT fell from the rock.

Petr.ACT cuts an onion.PAT.

Jan.ACT addressed Marie.PAT.

Petr.ACT dug a hole.PAT.

*A serious disease.ACT has developed
from a banal cold.PAT.*

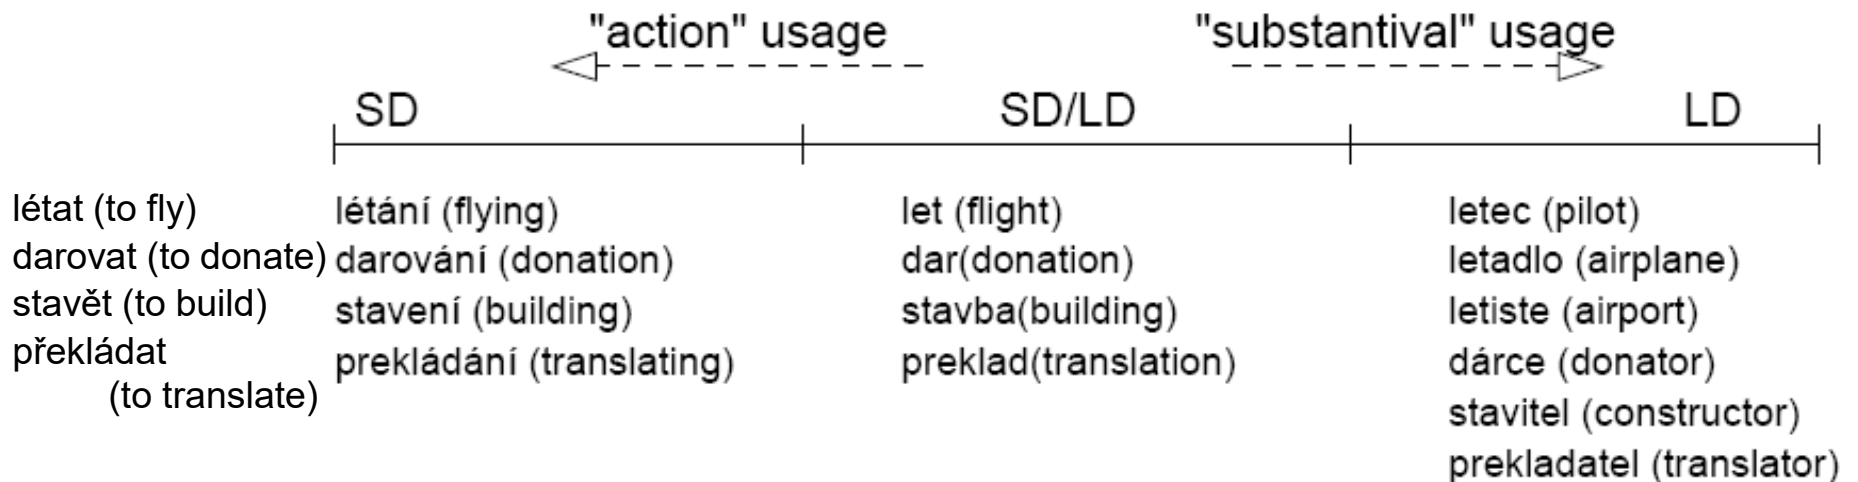

*The party.ACT has nominated him.PAT
for president.EFF.*

Jan.ACT grew from a boy.ORIG into a man.PAT.

Valency in FGD: Syntactic and Lexical Derivation

- *verb* → *deverbal noun*

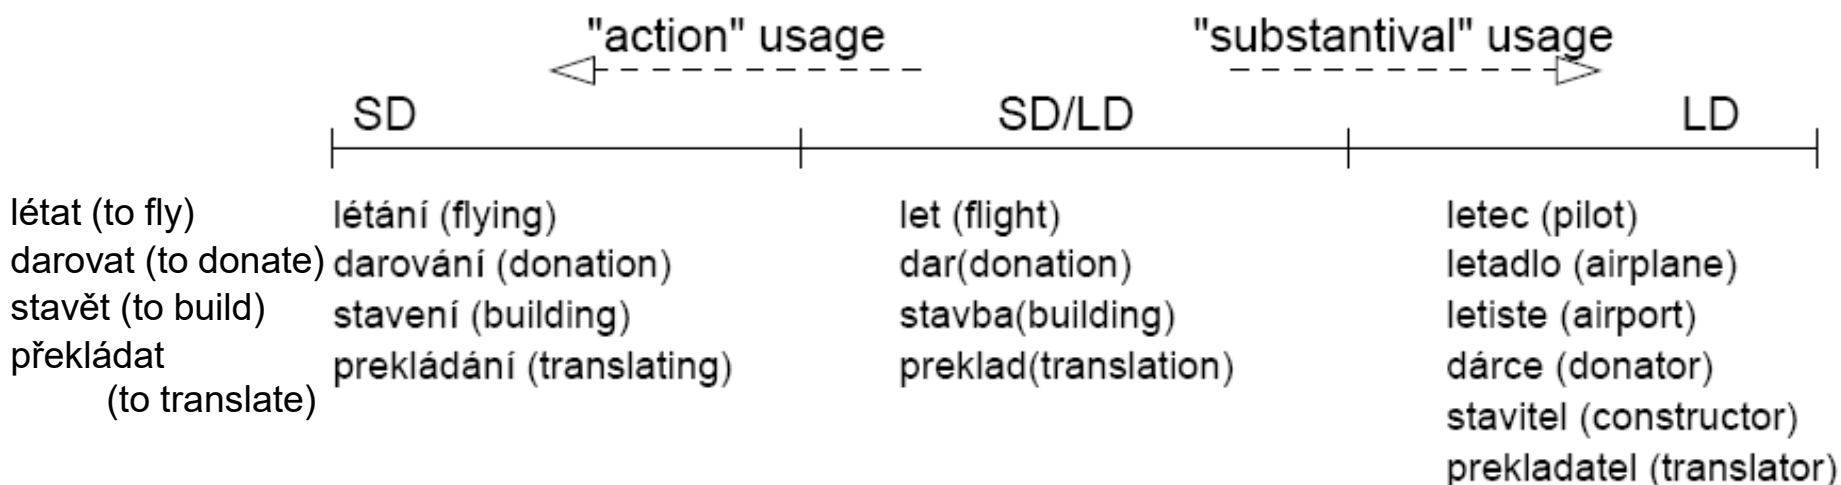

Valency in FGD: Syntactic and Lexical Derivation

- **verb → deverbal noun**

- valency frame is (somehow) inherited
- depending on the type of derivation
- depending on surface form
 - structural cases: Nom, Acc → Gen
 - semantic cases + prep. groups ... preserved
- embedded actants (e.g. *učit* 'teach' ACT PAT ADDR → *učitel* 'teacher' PAT ADDR)

Valency in FGD: Syntactic and Lexical Derivation

- **verbs → adjectives**

- valency frame is (somehow) inherited
- reduction of one valency position

dědeček čte dětem pohádky o princeznách

→ dědeček čtoucí dětem pohádky o princeznách

→ pohádky čtené dědečkem dětem

a grandpa is reading fairy tales on princesses to his grandchildren

→ *a grandpa (who is) reading fairy tales on princesses to his grandchildren*

→ *fairy tales read by a grandpa to his grandchildren*

číst [to read] ... ACT (PAT) ADDR EFF → *čtoucí ... (PAT) ADDR EFF*

→ *čtený ... ACT ADDR*

omezit [to restrict]... ACT PAT (EFF) → *omezený [restricted] ... ACT EFF*

Valency in FGD: Adverbs

- not studied yet

- **adjectives** → **adverbs**
valency frame is inherited

kolmý na něco [orthogonal to st] → *kolmo na něco [orthogonally to st]*

Valency in PDT / PCEDT: Outline

- concept of valency
as the keystone for syntactic structure
- valency in PDT and PDT-Vallex
valency in PCEDT and EngVallex, CzEngVallex
 - functors as labels for actants and free modifications
 - functors for nominal and adjectival dependents
 - functors for non-valency relations

documentation:

PDT: <http://ufal.mff.cuni.cz/pdt2.0/doc/manuals/en/t-layer/html/index.html>

PCEDT: <https://ufal.mff.cuni.cz/pcedt2.0/en/documentation.html>

Syntactic Information in PDT/PCEDT

- attribute *functor* for *all* nodetypes
- functors ... labels for the type of syntactic relation governing/parent node – modifying/child node
- complex nodes ... functor ~ type of valency dependent
 - actants
 - free modifications
 - verbal complement / secondary predication (Cz: doplněk)
- other nodetypes ... functor ~ non-valency relation
 - coordination
 - effective root of an independent clause
 - rhematizers, conjunction modifiers
 - multiword expressions
- (OPER)

Valency in PDT: PDT-VALLEX

- all sem. verbs, some nouns, adjectives, adverbs (aspectual counterparts as different units)
- attribute *val_frame.rf* ~ list of frame members
for each frame member:
 - functor
 - obligatory or optional
 - possible realizations
- consistency checking
- alternations/diatheses !!!

* odpovídání

ACT(.2, u) PAT(*na-l*[.4]) ADDR(.3) ?EFF(*že*[.v]) v-w2838f1 Used: 1x
(*odpovídat- dávat odpověď*) nedokončitelné odpovídání a tázání

* odpovídat

ACT(.1, *že*[.v]) PAT(.3) v-w2839f1 Used: 85x

zaměstnání odpovídá jeho schopnostem
řešení o. požadavkům

ACT(.1) ?PAT(*na-l*[.4]) ADDR(.3) EFF(.4, .7, *že*[.v], *zda*[.v], *aby*[.v], *at*[.v], s.,

v-w2839f2 Used: 28x

odpovídal mu na jeho dotaz, že nemá pravdu
o. nám na dotazy
o. pravdu
o. nám tato slova

ACT(.1) PAT(*za-l*[.4]) ?ADDR(.3) v-w2839f3 Used: 14x

odpovídáš mi za ztrátu
svým majetkem. MEANS

ACT(.1) PAT(*na-l*[.4]) v-w2839f4 Used: 2x

organismus odpovídal na zákrok
tvorbou. MANN vaziva
tímto způsobem. MANN o. na nátlak obyvatelstva

- John asked a question of his professor.

Argument mapping for "ptát se" (v-w537f1)

ACT → ACT

EFF → PAT

ADDR → ADDR

PAT → ---

pcedt The discrepancy may be because **asking people** about their fitness **regime** is a bit like inquiring about their love life .

pcedt Rozpor může být způsoben tím , že **ptát se lidí** na cvičební **režim** je trochu jako vyzvídat podrobnosti milostného života .

Valency in PDT/PCEDT: Actants (Verbs)

- Actor (ACT) ... functor for the first syntactic position
- Patient (PAT) ... functor for the second syntactic position
- Effect (EFF) ... the third syntactic position (semantically indistinct)
- Addressee (ADDR)
- Origin (ORIG)

Valency in PDT/PCEDT: Actants (Verbs)

- **Actor (ACT)** ...functor for the first syntactic position

human and non-human agent

Její manžel tam pracuje dál.

Her husband still works there.

Ten román mě oslovil.

The novel appealed to me.

Byl zabit bleskem

He was killed by lightning.

zločiny mafie na Sicílii

the Mafia's crimes on Sicily

bearer of an event / of a quality or property

Sklo zůstává nalepené na fólii

The glass stays stuck to the foil.

Matka leží.

Our mother is in bed.

Karoserie je z plechu.

The car body is made of plate.

radost obyvatel z nezávislosti

the joy of the citizens of an independence

experiencer

Českým skokanům se dařilo dobře. *The Czech jumpers were doing well.*

Je mi smutno.

I am sad

Líbí se mi to.

I like it.

possessor

Přítel má nové auto.

A friend of mine has a new car.

Přítel prodal chalupu.

A friend of mine sold his cottage.

Valency in PDT/PCEDT: Actants (Verbs)

- Actor (ACT)
- **Patient (PAT)** ... functor for the second syntactic position
object affected by an event (created / being destroyed / changing its property ...)

Postavili stany.

They pitched the tents.

Uspal dcerku.

He put his daughter to sleep.

Prodal dům.

He sold the house.

Házel kamenem

He was throwing a stone.

object specifying an event or its goal

Rád hraje kopanou / na klavír

He likes playing football / the piano

possessor

Kniha patří Janovi

The book belongs to Jan.

Matce nezbyly žádné peníze.

No money remains to my mother.

stimulus

Jareček se bojí psů.

Jareček is afraid of dogs.

recipient

Ozval se mu.

He let him know.

theme/topic of a book, story, painting (esp. verbs of communication)

Vyprávěl nám o svých cestách.

He was talking on his travels.

Valency in PDT/PCEDT: Actants (Verbs)

- Actor (ACT)
- Patient (PAT)
- **Effect (EFF)** ... the third syntactic position (semantically indistinct) quality/property or state the Patient has in the course of the event

Považoval Pavla za odborníka. He considered Pavel a professional.

Zachovali památku neporušenou. They kept the memory intact.

final state

Zvýšili počet voličů z 50% na 75%. They increased the number of the voters from 50% to 75%.

so called slavonic accusative (esp. verbs of perception)

Slyšet hodiny tíkat. lit: He heard the clock ticking.

dictum = what was said (esp. verbs of communication)

Petr vyprávěl o dovolené zábavné historky.

Petr told us amusing stories about his holiday.

direct or indirect speech

Řekli mu: "Nechod tam!"

They told him: "Do not go there!"

Oznámil, že nepřijde.

He announced that he would not come.

Valency in PDT/PCEDT: Actants (Verbs)

- Actor (ACT)
- Patient (PAT)
- Effect (EFF)
- **Addressee (ADDR)**

recipient with verbs of giving

Dal dítěti hračku.

He gave the child a toy.

Učí děti angličtinu.

He gives children English lessons.

original possessor

Vzal dítěti hračku.

He took the toy from the child.

 - ADDR: *nepříjemný komu [unpleasant to sb], přístupný komu [accessible to sb] povědomý komu [familiar to sb]*
 - PAT ADDR: *odpovědný komu za co [responsible for st to sb], vděčný komu za co [grateful to sb for st]*

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination, apposition
- complex predicates, multiword expressions, phrasemes
- rhematizers

Functors for Non-Valency Relations

- effective root of an independent clause

PRED *Pavel dal kytku Marii. Paul gave a flower to Mary.*

DENOM restriction to nouns in nominative

Názory čtenářů. Readers' opinions.

VOCAT *Milá Jano! Dear Jane!*

Pane majore, hodlám zavést nové prvky. Sir, I intend to introduce new elements.

PARTL *Pozor! Attention!*

Ano, to je pravda. Yes, that is true.

PAR *Přijedu 13. prosince (pátek). I will arrive on December 13 (Friday).*

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination, apposition

CONJ *Mezi smysly patří zrak a sluch. Eyesight and hearing belong to the senses.*

Vyniká jak svědomitostí, tak houževnatostí.

She stands out due to her thoroughness, as well as her stringiness.

Šel, aniž by to viděl. {#Neg.CM} lit. He was walking without seeing it.

DISJ *ať vítaný, či nevítaný welcome or not (only one of them is true)*

Vysloví se bud' pro, nebo proti návrhu.

They will be either for or against the proposal.

ADVS *Vypadalo to, že bude hezky, ale začalo pršet.*

The weather looked nice but then it started raining.

CONFR *Bristol je v Anglii, kdežto Glasgow je ve Skotsku.*

Bristol is in England, whereas Glasgow is in Scotland.

CONTRA *spor Klaus versus Zieleniec. a variance Klaus vs. Zieleniec*

CSQ *Byl nemocný, proto nepřišel. He was sick so that's why he didn't come.*

GRAD *Nemůže se pohnout, natož vstát. He can't move, let alone get up.*

REAS *Úkol splníme, vždyt' není obtížný. We'll fulfill the task, for it is not difficult.*

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination, apposition

APPS

Božena Němcová _ *autorka Babičky*

Božena Němcová _ *the author of Babička*

Morová rána : *Skuhravý zraněn.*

Catastrophe : *Skuhravý injured*

Labe/Elbe.

Tomu odpovídala cílová místa _ *Kypr, Kréta, Malta.*

This was reflected by the destinations _ *Cyprus, Crete, Malta.*

ODS (Občanská demokratická strana)

Právo je souhrnem norem, to jest předpisů, zákazů a sankcí.

*Law is a collection of norms, i.e. regulations,
prohibitions and sanctions.*

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination, apposition
- complex predicates, multiword expressions, phrasemes

CPHR ... a part of compound predicate ... 'light verb' + noun

Dostali rozkaz nevycházet ze stanů.

They received a command not to leave their tents.

Učinil rozhodnutí.

He made a decision.

Je třeba odejít.

It is necessary to leave.

BUT: verbonominal predicate with copula *být*

Kočka je savec.PAT

The cat is a mammal.PAT

DPHR ... (a dependent part of) a phraseme

Jde mi na nervy.

He gets on my nerves.

Chodil křížem.DIR2 krážem.

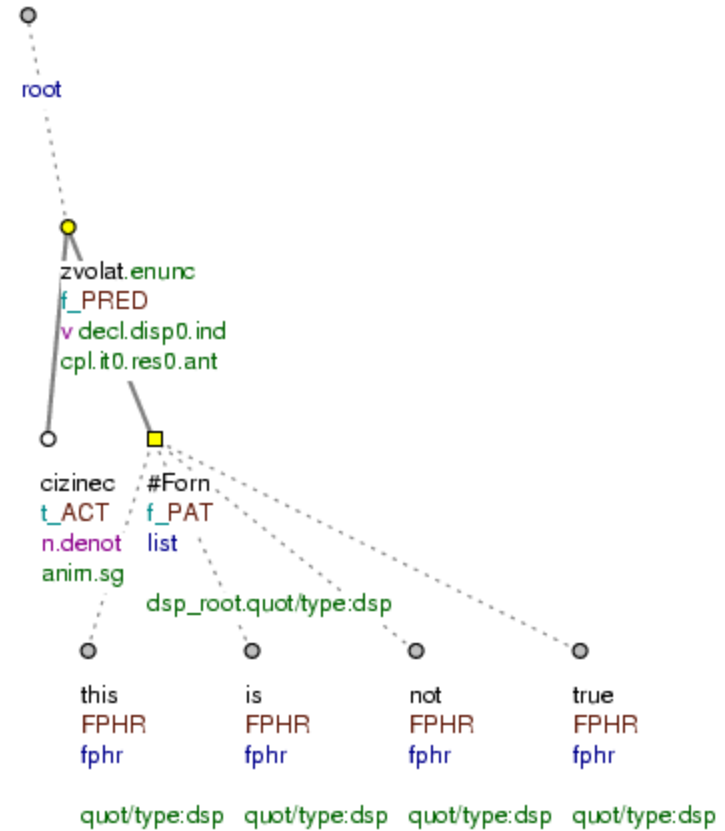

lit: He was walking criss cross.

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination, apposition
- complex predicates, multiword expressions, phrasemes

FPHR *Cizinec zvolal: "This is not true." The foreigner shouted: "This is not true".*

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination
- complex predicates, multiword expressions, phrasemes
- rhematizers; conjunction modifiers (see TFA later)

ATT	<i>Je to <u>bohudíky</u> za námi!</i>	<i>Is it <u>thank God</u> over!</i>
	<i>Vypovědět ji <u>prostě</u> nelze.</i>	<i>It is <u>simply</u> impossible to expel it.</i>
	<i>To je <u>fakticky</u> zlé.</i>	<i>That is <u>really</u> bad.</i>
INTF	<i>To <u>on</u> Jirka ještě spí.</i>	<i>lit: <u>Well</u>, Jirka still is still sleeping.</i>
MOD	<i><u>Pravděpodobně</u> přijdeme.</i>	<i>We will <u>probably</u> come.</i>
	<i>Vím <u>jistě</u>, že Praha mě poznamená.</i>	<i>I know <u>for sure</u> that Prague will affect me.</i>
PREC	<i>Jsem <u>tedy</u> šťasten.</i>	<i>I am <u>therefore</u> happy.</i>
	<i><u>Ale</u> to zatím není náš případ.</i>	<i><u>But</u> that is not our case so far.</i>

RHEM adverbial and particle expressions

On o tom jen nevěděl nic. He only did not know anything about it.

negative/affirmative expressions

Kdyby {#EmpVerb.COND} ano, pak by asi skončil ve vězení

If so then he would probably end up in prison.

Functors for Non-Valency Relations

- effective root of an independent clause
- coordination
- complex predicates, multiword expressions, phrasemes
- rhematizers; conjunction modifiers

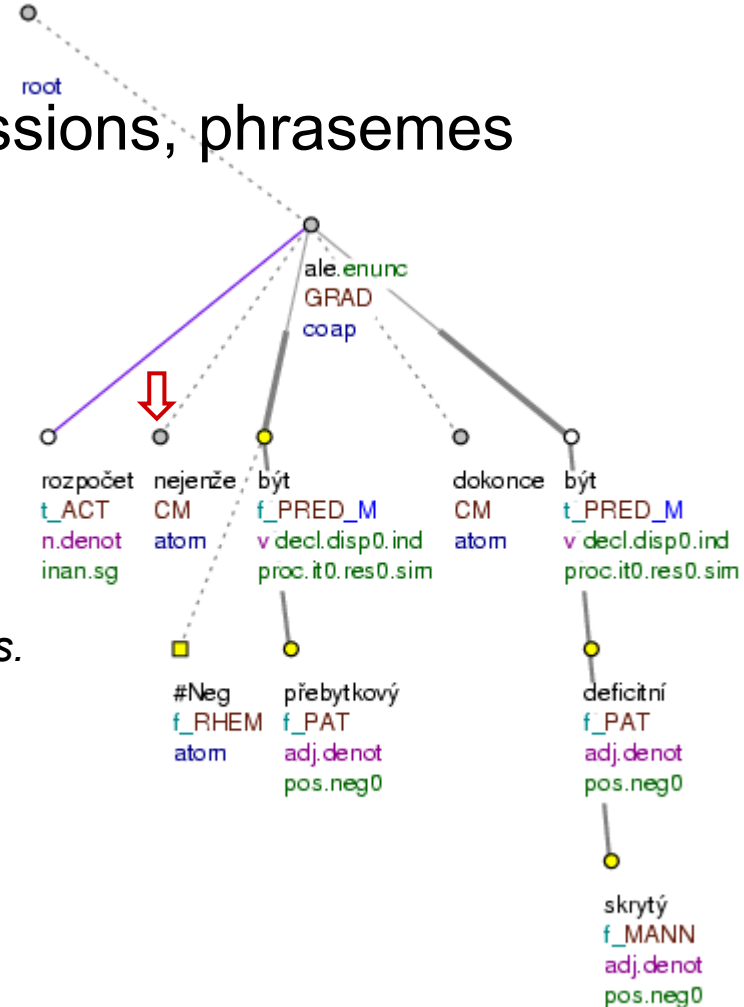

CM

*Rozpočet nejenže.CM není přebytkový,
ale.GRAD dokonce.CM je skrytě deficitní.*

*The budget not only isn't surplus,
it is even covertly deficit.*

*Kreslíme tužkou a.CONJ k tomu.CM ještě.CM
malujeme pastelkami.*

We draw with a pencil and moreover with colored pencils.
