

Combining Crowd and AI to **scale professional-quality translation**

João Graça
CTO

The Internet, 1997

80%
English

The Internet, 2017

“All translation firms together are able to translate **far less than 1%** of relevant content produced everyday”

CSA – MT Is Unavoidable to Keep Up with Content Volumes

Is Machine Translation already here?

* Is Neural Machine Translation Ready for Deployment? A Case Study on 30 Translation Directions
Marcin Junczys-Dowmunt, Tomasz Dwojak, Hieu Hoang

Everyone agrees that NMT is here to stay and much better than SMT

How Editors are Evaluated

The screenshot displays a web browser window with the URL `evaluation-tool-staging.unbabel.com`. The page header includes the 'Evaluation Tool' logo and a user identifier 'Hi pg270421'. Below the header, a navigation bar shows 'Evaluation', 'Language Pair: English to Portuguese(BR)', 'Tone: Not available', and 'Editor: blackshadowbr', along with a 'Report' button.

The main content area is divided into two columns. The left column, titled 'Source', contains the text: "I just started lurking crying," says Drozd. "It's my most cherished musical possession." And the old Flickinger console, which Linkous had struggled to restore, is fully functioning, at yet another old friend's studio in Richmond, capturing the sounds of songs awaiting to be heard. Below this is a 'Previous Version' section with a similar paragraph in Portuguese. The right column, titled 'Translation', shows a machine-generated translation of the source text. Below the translation is an 'Edit' button. At the bottom of the right column, there is a 'Rate this translation' section with a 'None' label and five star icons.

On the right side of the interface, there is a 'Comments' section with a text area for 'Insert comments stating the mistakes found or the reason for your rating.' Below this is a link to 'Check the guidelines'. At the bottom right, there are two buttons: 'Take a break' and 'Submit Evaluation', with a note 'This will save your progress'.
