

- The <http://ufal.mff.cuni.cz/styx> is a system designed to provide an **electronic corpus-based exercise book of Czech morphology and syntax** with exercises directly selected from the Prague Dependency Treebank <http://ufal.mff.cuni.cz/pdt>, the largest annotated corpus of Czech.

- Exercises give **practice in**
  - classifying part of speech and particular morphological categories of words (such as gender, number, case, tense, ...),
  - parsing a sentence and classifying syntactic function of words (such as subject, predicate, object, ...).

- **11,705** sentences to practice
- **Correct answers** at hand
- **Java** implementation
