Machine learning

for greenhorns

- **Bachelor** introduction to machine learning.

- **Standard** algorithms and techniques, plus theoretical **principles** behind them.

- Practicals in **Python**.

- **Several assignments** of 2 kinds each week:
  - **Implementation** of algorithms and techniqes for deeper understanding.
  - **Competition** assignments, with the aim of using existing implementations to obtain **best results** on the given dataset.

- Lectures by **J. Libovický** on **Tu 10:40 (Cz)**, **Tu 17:20 (En)**.
- Practicals by **T. Musil** on **Tu 12:20 (Cz)**, **Z. Kasner** on **We 9:00 (En)**.
