

PDT 3.5 Documentation

In this folder, the basic documentation for PDT 3.5 has been collected. It consists of

- Core annotation manuals for the m-, a- and t-layers, as used for the basic annotation in PDT 2.0, named accordingly PDT20-m/a/t-man-en/cz.pdf. Please note the morphology layer manual is available only in English.
- Short guide to PDT 2.0 is named PDT20-Basic-Guide-en/cz.pdf.
- Basic documentation about major updates of PDT 2.0, describing the additions (and in some cases, major corrections) to the previous version. These updates are marked (in the order of publication): PDT25-, PDIT10-, PDT30-, PDIT20-, PDT35-.

More documentation is available online (including the above, also in an indexed HTML format etc.) at the appropriate project pages, from PDT 2.0 to PDT 3.5. Start at <https://ufal.mff.cuni.cz/pdt3.5> and follow the links there – not only for documentation, but also for data and for URL links for online and offline tools to use or download.
