'Downloads' 28 Gb

Functional requirements include:

- Shibboleth authentication (with eduGain)
- Manual authorization mechanism
- Handles (and possibly also DOIs)
- Virtual records for resources stored in other systems
- OAI-PMH target for metadata harvesting
- Batch ingest (for c. 65000 items)
- Crosswalks from TEI metadata to:
  - Dublin Core
  - OLAC
  - CMDI
  - MARC

Non-functional requirements include:

- Community technical support
- Simple exit route from Dspace for data and services

Also desirable functionality:

- Search texts
- Cross-search collections
- Data submission and ingest system
