

NTIN066 - practicals 8

David Mareček

April 06, 2022

1. Prove that if H is (k, c) -independent for $k > 1$, then it is also $(k - 1, c)$ -independent
2. Prove that if H is $(2, c)$ -independent, then it is c -universal.
3. Prove that tabulation hashing is 3-independent but not 4-independent.
