

# Deep

# Learning

- ▶ **Deep neural networks** have been achieving significant **state-of-the-art** results in many areas (image/3D object/speech recognition, machine translation, games playing, etc).
- ▶ The course focuses both on newest **theory** and **practical implementations** in **Python + TensorFlow 2**. Basic Python programming skills required, **no** previous neural network knowledge needed.
- ▶ Assignments every week, including **competition** tasks where the goal is to obtain the **highest performance** in the class.

- ▶ From **Feb 13**, lectures **Mo 11:30 Cz**, **Tu 9:00 En**, practicals **Mo 15:40 Cz**, **Tu 12:20 En**; all recorded.
